Section VI: Terms of Reference

Background:

Jamshoro Power Generation Company-JPCL (hereinafter referred to as the **Client**) entered into an **Engineering, Procurement, and Construction (EPC) Contract** for construction of 660MW Coal Fired Power Plant Jamshoro. Certain components of the EPC scope of work have been **withdrawn and abandoned** by mutual consent of the Client and the EPC Contractor. These include:

- Training in Operational and Maintenance Personnel
- Procurement and Supply of Locomotives
- Construction of Ash Pond covering 100 acres of land, located at approximately 5~ 6 km distance from the project site

Moreover, the Client has requested the EPC contractor to add in the scope of EPC the procurement and supply of the critical and capital spare parts of the newly constructed power plant. The EPC has submitted a list of parts with cost which need to be evaluated and assessed for fair market price.

The EPC Contractor has submitted their claimed cost of the aforementioned withdrawn and additional works of supply. The Client intends to **engage an independent Third-Party Evaluator** to conduct an objective, transparent, and professional **cost evaluation** to determine the fair and reasonable value of these works for adjustment purposes.

The third-party evaluator firm/consultant to assess and review the cost of withdrawn and cancelled works (Manpower training, locomotives, and construction of 100-acre Slurry Ash Pond located 5~6 km away from main Power Plant) in an EPC contract document of 660MW Coal Fired Power Project, Jamshoro and additional cost of supply of parts.

The Consultant as third party shall audit contractor's cost claims for the withdrawn Ash Pond-related works, Manpower training and Locomotives and spare parts thoroughly to aid the client in financial and contractual decision-making, ensuring transparency and fairness consistent with EPC contract norms which aligns with practices of quality control and verification provisions typical in EPC agreements.

Objective of the Assignment:

The objective is to **independently verify and evaluate** the cost claimed by the EPC Contractor for the withdrawn and additional works and to recommend the **fair market-based cost** for each component, ensuring value-for-money, transparency, and justifiable cost adjustments.

Scope of Work:

The selected firm (hereinafter referred to as the **Evaluator**) shall perform, but not be limited to, the following tasks:

- **Document Review:**

- Study the **EPC Contract**, BOQs, cost breakdowns, contractor's claimed cost submissions, technical specifications, and related correspondence.
- Examine detailed engineering drawings and technical documents relevant to the withdrawn scope.

- **Cost Assessment and Verification:**

- Analyze the EPC Contractor's cost claims for:
 - **Training Programs:** Course content, number of trainees, training duration, cost per trainee, trainer fees, facility costs, etc.
 - **Locomotives:** Specifications, model details, market rates, procurement costs, importation, commissioning, and associated logistics.
 - **Ash Pond Construction:** Site development, excavation, lining, civil works, piping, peripheral road development for a 5~6 km distance, etc.
 - **Spare Parts:** Procurement and supply of critical and capital spare parts

- **Market Benchmarking:**

- Conduct market price surveys and reference checks from similar projects, relevant suppliers, and industry-standard cost indices.
- Validate prices for equipment, services, and construction works using current market data.

- **Site and Process Verification:**

If applicable, inspect any partially procured materials, services already rendered, or site preparations done prior to withdrawal of the works.

- Hold discussions with the EPC Contractor and the Client's team to collect clarifications and support documents.

- **Reporting**

Prepare a **detailed, itemized cost evaluation report**, highlighting:

- Verified costs
- Variations from market norms
- Any discrepancies or unjustified claims
- Recommendations for fair, reasonable, and acceptable costs for each withdrawn scope component

- **Support Services**

Provide necessary clarifications and attend negotiation meetings with the EPC Contractor if requested by the Client.

- **Deliverables:**

Deliverable	Timeline
Inception Report (Work Plan)	Within 7 days of award
Draft Cost Evaluation Report	Within 15 days of data receipt
Final Cost Evaluation Report	Within 15 days (post client review)
Presentations / Clarifications	As required

- Final evaluation report providing an independent cost assessment and justification of figures for client decision-making.

Methodology & Standards

The evaluation shall follow generally accepted cost auditing and forensic accounting principles in the EPC industry, including best practices from standard EPC agreements and cost verification procedures. Summarily, the evaluator's criteria should cover technical verification, cost completeness, physical site visits and assessment of site conditions, regulatory compliance, and market benchmarks to produce a well-substantiated independent assessment of the withdrawn works' cost including but not limited to the following.

- **Verification of Cost Components**

The evaluator should review all direct and indirect costs to be incurred by the EPC contractor, including labor, materials, equipment, site mobilization, and overheads, ensuring these align with contract terms and industry standards.

- **Assessment of Physical Status and Quantities**

Conduct site inspections to verify the extent of physical work required on the Ash Pond (100-acre area), confirming quantities of earthworks, ash management structures, and machinery installation or site training facilities are consistent with the cost figures.

- **Evaluation of Design and Construction Criteria Compliance**

Confirm the cost on design aspects such as pond sizing, water management, and environmental safeguards to meet relevant technical and regulatory guidelines, which could have cost involvement.

- Ensure appropriate representation at relevant meetings including site meetings, and progress meetings to discuss and agree appropriate actions
- **Review of Abandonment and Demobilization Costs**
Include assessment of expenses related to withdrawal and abandonment, such as equipment demobilization, site safety measures, disposal or storage of materials, and restoration or grading work required on the Ash Pond site.
- **Third-party Market Benchmarking**
Compare claimed costs with current market rates for similar works including training delivery, locomotive purchases, earthworks or ash pond construction and supply of spare parts for benchmarking reasonableness.
- **Compliance with Contractual and Environmental Requirements**
Verify costs include compliance with contractual obligations and environmental permits, including any remediation, erosion control, or pollution prevention required in site closure or abandonment.
- **Evaluation of Associated Costs for Logistics and Distance**
Given Ash Pond is 5~6 km away, assess transportation, logistics, and additional infrastructure costs factored into the claimed amounts for materials and personnel mobilization.
- For evaluating withdrawn training expenses, Cost per Employee: multiplied by the number of trainees as per contract.

Data Access and Coordination:

The evaluator will be granted access to all relevant project documents, personnel (including EPC contractor), and sites. Coordination with client-appointed representatives shall be ensured for smooth evaluation.

Timeframe & Milestones:

Define clear timelines for submission of inception, interim, and final reports respecting the assessing, Reviewing and Re-evaluation schedule.

Confidentiality:

All data, documents, and information provided to or generated by the Evaluator during the course of this assignment shall be treated as **strictly confidential** and shall not be disclosed to any third party without prior written consent from the Client.

Payment Terms

Specify basis of payment tied to deliverables' acceptance, aligned with standard third-party inspection and consultancy practices.

- **Contract Duration:**

The total duration for the assignment shall be **30–45 days** from the date of contract signing/Service Order.

- **Contact Information:**

All communications regarding this assignment shall be directed to:

Any such modification shall have retroactive effect and, in case remuneration has already been paid by the Procuring Agency before any such modification, (i) the Procuring Agency shall be entitled to offset any excess payment against the next monthly payment to the Consultants, or (ii) if there are no further payments to be made by the Procuring Agency to the Consultants, the Consultants shall reimburse to the Procuring Agency any excess payment within thirty (30) days of receipt of a written claim of the Procuring Agency. Any such claim by the Procuring Agency for reimbursement must be made within twelve (12) calendar months after receipt by the Procuring Agency of a final report and a final statement approved by the Procuring Agency in accordance with Clause GCC 46.1(d) of this Contract.”
